

Burns, Poisoning, CBRN, and Bites & Stings

First Aid/CPR/AED Refresher Module 8

DETENTION
TRAINING UNIT

The image features the word "JEOPARDY!" in a large, metallic, three-dimensional font. The letters are silver with a brushed metal texture and are set against a vibrant, futuristic background. The background consists of a blue and purple gradient with a grid of glowing blue lines that create a sense of depth and perspective. Several bright, multi-pointed starburst effects are scattered across the upper portion of the image. A horizontal band of orange and yellow light is visible behind the text, suggesting a horizon or a source of energy. The overall aesthetic is high-tech and dynamic.

JEOPARDY!

| Burns | Poisoning | Chemical Biological Radiological Nuclear (CBRN) | Bites | Stings |
|---------------|---------------|--|---------------|---------------|
| <u>\$200</u> | <u>\$200</u> | <u>\$200</u> | <u>\$200</u> | <u>\$200</u> |
| <u>\$400</u> | <u>\$400</u> | <u>\$400</u> | <u>\$400</u> | <u>\$400</u> |
| <u>\$600</u> | <u>\$600</u> | <u>\$600</u> | <u>\$600</u> | <u>\$600</u> |
| <u>\$800</u> | <u>\$800</u> | <u>\$800</u> | <u>\$800</u> | <u>\$800</u> |
| <u>\$1000</u> | <u>\$1000</u> | <u>\$1000</u> | <u>\$1000</u> | <u>\$1000</u> |

**How many burn
categories are there
(degrees)?**

**Name the three ways an
individual can be burnt**

What degree of burn is this?

What degree burn is this?

When responding to an electrical burn victim, what is the first thing the first responder must check?

**What are the 4 ways someone
can be poisoned?**

**Give two examples of
poisoning through ingestion**

After contacting EMS for a suspected overdose, what should the first responder do first for the victim?

**What kind of poisoning
happens primarily from
direct skin contact
exposure to things like
chemicals, pesticides or
fertilizers?**

**What is the phone number
for Poison Control?**

What should the
responder be aware of
FIRST when responding
to a potential CBRN
incident?

While responding to a CBRN Incident and the first responder becomes exposed to a contaminant, who should they report to?

Why is it important for the first responder to establish a secure perimeter when responding to a CBRN incident?

**What important
information should the
first on scene relay to the
Communication Center?**

What environmental factors play an important role in responding to a suspected CBRN incident and why?

**Should an attempt be
made to catch an animal
after it has bitten a
person?**

**After being bit by a snake,
should the first responder
attempt to suction out the
venom and apply ice and a
tourniquet to the effected
area?**

**Name this potentially fatal
infection that is spread
through the bite of animals
like bats, skunks, raccoons,
foxes, coyotes?**

**What clothing items
should be removed from
an individual after being
bitten by a snake?**

For a suspected rabies exposure, the hospital can give a series of shots to prevent the rabies virus from infecting an individual.

How many shots are given and how many days is the series?

What are common
side effects from an
insect sting?

**If visible, how should a
bee stinger be
removed?**

**What is the minimum
time someone should
be monitored for an
allergic reaction after
an insect sting?**

**What signs and symptoms
would a person exhibit from
an insect sting that would
require further treatment by
EMS?**

If someone is exhibiting a severe reaction to an insect sting, what prescribed medication can we assist in giving them?
